

**K.K.Wagh Institute of Engineering Education and Research, Nashik  
(Autonomous from Academic Year 2022-23)**

<b>F. Y. M.C.A. Pattern 2022 Semester: I MCA221001: Discrete Mathematics</b>			
<b>Teaching Scheme:</b>	<b>Credit Scheme:</b>	<b>Examination Scheme:</b>	
<b>Theory : 03 hrs/week</b>	<b>03</b>	<b>InSem Exam: 20Marks Continuous Comprehensive Evaluation: 20Marks EndSem Exam: 60Marks</b>	
<b>Prerequisite Courses, if any: Nil</b>			
<b>Course Objectives:</b>			
<ol style="list-style-type: none"> <li>To develop logical thinking and its application to computer science</li> <li>To study use of set, relation and function models to solve practical problems</li> <li>To learn fundamental counting principle , permutation and combinations</li> <li>To introduce basic concepts of graphs and trees</li> </ol>			
<b>Course Outcomes:</b> On completion of the course, students will be able to–			
	<b>Course Outcomes</b>		<b>Bloom's Level</b>
<b>CO1</b>	Understand discrete objects, relationship among them and Solve real world problems logically by using set and induction approaches.		02-Understand
<b>CO2</b>	Demonstrate an understanding of relations and functions		02-Understand
<b>CO3</b>	Apply counting principles to determine probabilities and logical reasoning to solve problems		03-Apply
<b>CO4</b>	Analyze problems in computer science using tree and graph		04-Analyze
<b>COURSE CONTENTS</b>			
<b>Unit I</b>	<b>Set Theory and Propositional Logic</b>	<b>(07hrs)</b>	<b>COs Mapped - CO1</b>
<b>Set Theory</b>			
Introduction: History of mathematics as related to discrete structure, motivations for discrete Structure, Sets: introduction, combination of sets, finite and infinite sets, uncountable infinite sets, Principle of inclusion/exclusion (addition principle)			
<b>Propositional Logic</b> -Introduction, Propositional Equivalences, Application of Propositional Logic-Translating English Sentences, Proof by Mathematical Induction			
<b>Unit II</b>	<b>Relations and Function</b>	<b>(07hrs)</b>	<b>COs Mapped – CO2</b>
<b>Relations:</b> Definitions, properties of binary relation, Applications of relation, Relation representation, equivalence relation, partial ordering relations, Hasse diagram, closure of relations, Warshall's algorithm,			
<b>Functions:</b> Subjective, Injective and Bijective functions, Inverse Functions and composition of functions, The Pigeonhole Principle			
<b>Unit III</b>	<b>Permutation and Combination</b>	<b>(07hrs)</b>	<b>COs Mapped – CO3</b>
<b>Permutations and Combinations:</b> Rules of sum and products, counting principle, permutations,			

combinations, generations of permutations and combinations			
<b>Unit IV</b>	<b>Graph Theory</b>	<b>(08hrs)</b>	<b>COs Mapped – CO4</b>
<b>Graphs :</b> Basic terminology, Types of graph, Graph representation, Graph isomorphism, paths and Circuits, shortest path in weighted graphs, Hamiltonian and Eulerian paths and circuits, Graph coloring, Case Study-Web Graph			
<b>Unit V</b>	<b>Trees</b>	<b>(07hrs)</b>	<b>COs Mapped - CO4</b>
<b>Trees :</b> Introduction, rooted trees, path length in rooted trees, prefix codes and optimal prefix codes, binary search trees, tree traversals, spanning trees, minimal spanning trees, Kruskal's and Prim's algorithms for minimal spanning tree			
<b>Text Books</b>

<b>F. Y. M.C.A. Pattern 2022 Semester: I MCA221002: Data Structures and Algorithms</b>			
<b>Teaching Scheme:</b>	<b>Credit Scheme:</b>	<b>Examination Scheme:</b>	
<b>Theory : 03 hrs/week Practical : 04 hrs/week</b>	<b>03 02</b>	<b>InSem Exam: 20Marks Continuous Comprehensive Evaluation:20Marks EndSem Exam: 60Marks Termwork: 50Marks Practical Exam: 50Marks</b>	
<b>Prerequisite Courses, if any: Nil</b>			
<b>Course Objectives:</b>			
5. To study the representation, structural constraints, implementation and applications of basic data structures			
6. To develop the ability to analyze algorithms			
7. To learn linear and nonlinear data structures and their applications			
8. To understand searching and sorting techniques and their applications			
9. To study applications of Data Structure in solving real life problems			
<b>Course Outcomes:</b> On completion of the course, students will be able to–			
	<b>Course Outcomes</b>		<b>Bloom's Level</b>
<b>CO1</b>	Demonstrate use of sequential data structures - array and linked list		3 - Apply
<b>CO2</b>	Implement stack and queue data structures for real application		3 - Apply
<b>CO3</b>	Use nonlinear data structure for solving problems of various domain		3 - Apply
<b>CO4</b>	Compare various searching and sorting techniques		4 - Evaluate
<b>CO5</b>	Analyze algorithms using time and space complexity		4 - Evaluate
<b>COURSE CONTENTS</b>			
<b>Unit I</b>	<b>Introduction to Data Structures and Algorithms</b>	<b>08hrs</b>	<b>COs Mapped - CO1, CO5</b>
Algorithms: Introduction to Algorithms, Analysis of Algorithms, Space complexity, Time complexity, Asymptotic notation- Big-O, Theta and Omega, standard measures of efficiency. Introduction to data structures, Abstract Data types (ADT), Linear data structures using sequential organization: Concept of sequential organization, Concept of Linear data structures, arrays as ADT, Multidimensional arrays, Storage representations (row major and column major). Application of array in sparse matrix representation, addition and transpose			
<b>Unit II</b>	<b>Linked Lists</b>	<b>05hrs</b>	<b>COs Mapped - CO1, CO5</b>
Concept of linked organization, singly linked list, doubly linked list, circular linked list and operations on it. Application of linked list for Representation and manipulations of polynomials			
<b>Unit III</b>	<b>Stacks and Queues</b>	<b>06hrs</b>	<b>COs Mapped – CO2, CO5</b>
Concept of stack and queues as ADT, Implementation of stacks using sequential and linked			

organization, linear queue, circular queue using sequential and linked organization, Priority Queue, Deque, Application of stack for expression conversion, evaluation, recursion and backtracking Application of queue in job scheduling			
<b>Unit IV</b>	<b>Trees and Graphs</b>	<b>06hrs</b>	<b>COs Mapped – CO3, CO5</b>
Introduction, concepts and basic terminologies. Sequential & Linked representation of trees and graphs. Algorithm for tree and graph traversals, Applications of trees and graphs			
<b>Unit V</b>	<b>Searching and Sorting</b>	<b>05hrs</b>	<b>COs Mapped – CO4, CO5</b>
Sequential, binary and Fibonacci search. General concepts: sort order, sort stability, efficiency and passes, Internal and external sorting, Bubble sort, Quick sort, Merge sort, Heap sort			
<b>Text Books</b>

<b>Guidelines for Continuous Comprehensive Evaluation of Theory Course</b>		
<b>Sr. No.</b>	<b>Components for Continuous Comprehensive Evaluation</b>	<b>Marks Allotted</b>
1	Open Book Test – 1 on unit 3 and 4	10
2	Quiz - 1 on unit 5	5
3	Assignments – 1 on unit 1,2,3 Assignments – 2 on unit 4,5	5

<b>List of Laboratory Experiments / Assignments</b>		
<b>Sr. No.</b>	<b>Laboratory Experiments / Assignments</b>	<b>CO Mapped</b>
1	Write a program to represent sparse matrix using array and perform simple and fast transpose	<b>CO1</b>
2	Write a menu driven program to perform following operations on singly linked list: Create, Insert, Delete, reverse, search, count and Display	<b>CO1</b>
3	Write a menu driven program which will maintain a list of car models, their price, name of the manufacture, engine capacity etc. as a doubly linked list. The menu should make provisions for inserting information pertaining to new car models, delete obsolete models, update data such as price besides answering queries such as listing all car models within a price range specified by the client and listing all details given a car model	<b>CO1</b>
4	Write a program to implement stack as an ADT. Use this ADT to perform expression conversion and evaluation. (Infix – Postfix)	<b>CO2</b>
5	Write a program to implement circular queue using arrays	<b>CO2</b>
6	Write a program to create binary tree. Find height of the tree and print leaf nodes. Find mirror image, print original and mirror image using level-wise printing	<b>CO3</b>
7	Write a program that reads a list of names and telephone numbers from user and insert into a BST tree. Once the tree has been built, present the user with a menu that allows him to search the list for a specified name, insert new name, delete an existing name or print the entire phone list.	<b>CO3</b>
8	Write a program to create graph, use the map of any city as the graph. Represent graph using adjacency list/adjacency matrix and perform Depth First Search and Breadth First Search.	<b>CO3</b>
9	Write a program to represent a graph of any city using adjacency matrix /adjacency list. Nodes should represent the various areas in the city and links should represent the distance between them. Find the shortest path of your college from your home using Dijkstra's algorithm	<b>CO3</b>
10	Write a program to create student database. Database contains different fields of student like Roll No, Name and percentage. Search a particular student according to roll number using binary search.	<b>CO4</b>
11	Write a program to arrange list of students to find out first ten toppers from a class using Bubble sort. (refer the student database given in assignment 10)	<b>CO4</b>
12	Write a program to implement Merge sort / Quick sort method	<b>CO4</b>
<b>Guidelines for Laboratory Conduction</b>		
1. Use of open source software is encouraged. 2. Based on the concepts learned, instructor will ensure mini-project development by the students 3. Instructor should identify and set one assignment beyond the scope of syllabus. 3. Operating System recommended :- Windows / Open source Linux or its derivative		
<b>Guidelines for Student's Lab Journal</b>		
1. The laboratory assignments are to be submitted by student in the form of journal. 2. Journal consists of certificate, table of contents, and handwritten write-up of each assignment (Title, Objectives, Problem Statement, Outcomes, Date of Completion, assessor's sign, Theory-		

Concept in brief, algorithm, flowchart, conclusion.).

3. Program codes with sample output of all performed assignments are to be submitted as softcopy.

4. Course in-charge is highly encouraged to maintain softcopy of all the students assignments

#### **Guidelines for Term work Assessment**

Continuous assessment of laboratory work is done based on overall performance of student. Each lab assignment assessment will assign marks based on rubrics. Suggested rubrics for overall assessment include-

<b>Sr. No.</b>	<b>Components for Continuous Assessment</b>	<b>Marks Allotted</b>
1	R1: Timely Submission	10
2	R2: Understanding	10
3	R3: Clarity of Journal Writing	10
<b>Total Marks:</b>		<b>30</b>
Each assignment will get 30 marks. Average of all assignments is converted in to total TW marks		

**K.K.Wagh Institute of Engineering Education and Research, Nashik  
(Autonomous from Academic Year 2022-23)**

<b>F. Y. M.C.A.</b> <b>Pattern 2022 Semester: I</b> <b>MCA221003: Data Communication and Network</b>			
<b>Teaching Scheme:</b>	<b>Credit Scheme:</b>	<b>Examination Scheme:</b>	
<b>Theory : 03 hrs/week</b>	<b>03</b>	<b>InSem Exam: 20Marks</b> <b>Continuous Comprehensive Evaluation: 20Marks</b> <b>EndSem Exam: 60Marks</b>	
<b>Prerequisite Courses, if any: Nil</b>			
<b>Course Objectives:</b>			
1. To understand the fundamental concepts of networking standards, protocols and technologies 2. To learn different techniques for framing, error control, flow control and routing 3. To learn different layer protocols in the protocol stacks			
<b>Course Outcomes:</b> On completion of the course, students will be able to–			
	<b>Course Outcomes</b>	<b>Bloom's Level</b>	
<b>CO1</b>	Illustrate fundamental concepts of Computer Networks, architectures, protocols and technologies	1-Knowledge	
<b>CO2</b>	Summarize the working and functions of data link layer	2-Understand	
<b>CO3</b>	Compare the working of different routing protocols and mechanisms	3-Apply	
<b>CO4</b>	Solve client-server applications using sockets	3-Apply	
<b>CO5</b>	Describe role of application layer with its protocols	3-Apply	
<b>COURSE CONTENTS</b>			
<b>Unit I</b>	<b>Introduction</b>	<b>07hrs</b>	<b>COs Mapped - CO1</b>
Definition, Types of Networks: LAN, MAN and WAN, Wireless networks, Networks Software, Protocol, Design issues. Network Models: The OSI Reference Model, TCP/IP Model, Network Topologies, Types of Transmission Medium. Network Architectures: Client-Server, Peer To Peer, Hybrid. Network Devices: Bridge, Switch, Router, Gateway, Access Point. Line Coding Schemes: Manchester and Differential Manchester Encodings, Frequency Hopping (FHSS) and Direct Sequence Spread Spectrum (DSSS).			
<b>Unit II</b>	<b>Data Link Layer</b>	<b>08hrs</b>	<b>COs Mapped - CO2</b>
Design Issues: Services to Network Layer, Framing. ARQ strategies: Error Detection and correction, Parity Bits, Hamming Codes (11/12-bits) and CRC. Flow Control Protocols: Unrestricted Simplex, Stop and Wait, Sliding Window Protocol. WAN Connectivity: PPP and HDLC. MAC Sub layer: Multiple Access Protocols: Pure and Slotted ALOHA, CSMA, WDMA, CSMA/CD, CSMA/CA, Binary Exponential Back-off algorithm			
<b>Unit III</b>	<b>Network Layer</b>	<b>07hrs</b>	<b>COs Mapped – CO3</b>
Functions of Network layer, Switching Techniques, IP Protocol: Classes of IP (Network addressing), IPv4 , IPv6, Network Address Translation, Sub-netting , CIDR. Network layer Protocols: ARP, RARP,			

ICMP, IGMP. Network Routing and Algorithms: Static Routing, Dynamic Routing, Distance Vector Routing, Link State Routing, Path Vector. Routing Protocols: RIP, OSPF, BGP, MPLS. Routing in MANET: AODV, DSR, Mobile IP.

<b>Unit IV</b>	<b>Transport Layer</b>	<b>07hrs</b>	<b>COs Mapped – CO4</b>
----------------	------------------------	--------------	-------------------------

Process to Process Delivery, Services, Socket Programming. Elements of Transport Layer Protocols: Addressing, Connection establishment, Connection release, Flow control and buffering, Multiplexing, Congestion Control. Transport Layer Protocols: TCP and UDP, SCTP, RTP, Congestion control and Quality of Service (QoS), Differentiated services, TCP and UDP for Wireless networks.

<b>Unit V</b>	<b>Application Layer</b>	<b>07hrs</b>	<b>COs Mapped – CO5</b>
---------------	--------------------------	--------------	-------------------------

Introduction: Client Server Paradigm: Communication using TCP and UDP, Peer to Peer Paradigm, Application Layer Protocols: DNS, FTP, TFTP, Web and HTTP, Web Caching, Email: SMTP, MIME, POP3, Webmail, DHCP, Network Management: SNMP.

<b>Prerequisite Courses, if any: Nil</b>			
<b>Course Objectives:</b>			
<ol style="list-style-type: none"> <li>1. To learn the fundamentals of web essentials and markup languages</li> <li>2. To become familiar with the client side technologies-JavaScript in web development</li> <li>3. To introduce XML concept in web application</li> <li>4. To get familiar with JSON to the <i>code for creating JavaScript objects</i></li> </ol>			
<b>Course Outcomes:</b> On completion of the course, students will be able to–			
	<b>Course Outcomes</b>		<b>Bloom's Level</b>
<b>CO1</b>	Explain the fundamental programming skills required to design Web applications		2-Understand
<b>CO2</b>	Apply JavaScript concepts		3-Apply
<b>CO3</b>	Differentiate between XML, HTML and JSON documents		3-Apply
<b>CO4</b>	Demonstrate the concepts of server-side web applications using PHP		3-Apply
<b>CO5</b>	Implement web application using angular		3-Apply
<b>COURSE CONTENTS</b>			
<b>Unit I</b>	<b>Introduction</b>	<b>07hrs</b>	<b>COs Mapped - CO1</b>
Introduction to Web Technology, Hypertext Markup Language and its components, HTML tags and attributes, HTML 5 and its essentials, HTML5- Next Generation of Web Development: Headings, paragraphs, line break, colors and fonts, links, frames, lists, tables, images and forms			
<b>Unit II</b>	<b>JavaScript</b>	<b>07hrs</b>	<b>COs Mapped – CO2</b>
Exploring the features of JavaScript, Programming fundamentals of JavaScript: data types, control Structures: if..else, switch case, loop controls: for, while, for..in ,Functions and dialog boxes, JavaScript-Number Properties, JavaScript string properties, JavaScript-array properties			
<b>Unit III</b>	<b>XML and JSON</b>	<b>07hrs</b>	<b>COs Mapped – CO3 And CO4</b>
Exploring XML, comparing XML with HTML, advantages and disadvantages, structure of XML documents, entity references, XML parser, Description of DTD			
What is JSON and Working of JSON, Create a JSON File, JSON Documentation: Documenting a JSON element, acceptable values and element nesting, an alternative to indenting			

<b>Unit IV</b>	<b>PHP</b>	<b>07hrs</b>	<b>COs Mapped – CO4</b>
Introduction to Web Development with PHP, The architecture of a web application, structure of PHP application, control statements, strings and numbers, arrays, functions, Design a database in PHP, use of SQL with MySQL database			
<b>Unit V</b>	<b>Fundamentals of Angular</b>	<b>08hrs</b>	<b>COs Mapped – CO5</b>
Angular Application Architecture, use of NgModule, Angular Components, Angular Templates, Data Binding, Types of Data Binding, Modules Component Working, Directives, Structure Directives, Template Routing, Theme Implementation in Angular Framework, Angular Forms, Services, Inject Services, Angular Server Communication With Backend Server, Working of APIs (GET, POST, PUT, DELETE), Complete Web application In Angular Framework

Design Concepts, The Design Model, Pattern based Software Design, Software Architecture and Design, Architectural Styles, A Brief Taxonomy of Architectural Styles; Components based design and Database design. Cohesion & Coupling, Classification of Cohesiveness & Coupling, Function Oriented Design,			

Object Oriented Design, User Interface Design, Failure and Faults, Reliability Models: Basic Model, Logarithmic Poisson Model, Calendar time Component, Reliability Allocation.

<b>Unit IV</b>	<b>Software Metrics</b>	<b>07hrs</b>	<b>COs Mapped – CO4</b>
----------------	-------------------------	--------------	-------------------------

Introduction to software metrics, Size metrics like LOC, Token count, Function Count, Data Structure Metrics, Information Flow metrics, Object oriented metrics, Use-case oriented metrics, Web Engineering Project Metrics, Analysis of metrics, Metrics for Maintenance and metrics for Source Code Defining Software Scope and checking feasibility, Resources Management, Reusable Software Resources, Environmental Resources, Software Project Estimation and Decomposition Techniques.

<b>Unit V</b>	<b>Software Configuration Management and Ethics in Software Engineering</b>	<b>08hrs</b>	<b>COs Mapped – CO4, CO5.</b>
---------------	---	--------------	-------------------------------

**Software Configuration Management:** Software Configuration Management, The SCM repository, The SCM Process, Configuration Management for software system.

**Leadership of Software Engineer:** Different approaches to Leadership, Styles of Leadership, Emotional Intelligence. **Software Engineering Ethics:** Ethical Leadership, Common Ethical Dilemmas, Making Ethical Decisions, Codes of Ethics and Professional Practices.

**Suggested Free Open Source Tools:** CF Engine Configuration Tool, Puppet Configuration Tool

<b>Theory : 01 hr/week Practical : 02 hrs/week Tutorial : 01hr/week</b>		<b>01 01 01</b>	<b>TermWork: 25Marks Tutorial: 25Marks</b>
<b>Prerequisite Courses, if any: ---</b>			
<b>Course Objectives:</b> <ol style="list-style-type: none"> <li>1. To acquire programming skills in core Python</li> <li>2. To understand decision-making and functions in python</li> <li>3. To explore libraries and database operations in python</li> </ol>			
<b>Course Outcomes:</b> On completion of the course, students will be able to–			
	<b>Course Outcomes</b>		<b>Bloom's Level</b>
<b>CO1</b>	Illustrate basic programming constructs in python		1-Knowledge
<b>CO2</b>	Apply user defined functions and file handling methods in python		3-Apply
<b>CO3</b>	Apply data visualization and plotting techniques		3-Apply
<b>CO4</b>	Evaluate the data using appropriate python libraries		5- Evaluate
<b>COURSE CONTENTS</b>			
<b>Unit I</b>	<b>Basics of Python Programming</b>	<b>4hrs+4hrs Tutorial</b>	<b>COs Mapped - CO1, CO2...</b>
<b>Introduction:</b> Features of Python, Installation, Interactive Shell, Program Structure and fundamentals of Python programming. Variables, strings, functions, loops, and conditions in Python. The nuances of collection, lists, sets, dictionaries, conditions and branching. Data in Python: Objects and classes in Python including reading and writing files, loading, working, and saving data with pandas.			
<b>Unit II</b>	<b>Python Libraries</b>	<b>4hrs+4hrs Tutorial</b>	<b>COs Mapped - CO1, CO2, CO4</b>
Python Libraries-I: Implementation of multi-dimensional arrays in NumPy, Manipulation of DataFrames in pandas. Python Libraries-II: Implementation of Scrapy Python Library for large scale web scrapping.			
<b>Unit III</b>	<b>Python for Data Visualization</b>	<b>4hrs+4hrs Tutorial</b>	<b>COs Mapped - CO3, CO4</b>
Visualization with matplotlib – line plots – scatter plots – visualizing errors – density and contour plots – histograms, binnings, and density – three dimensional plotting – geographic data – data analysis using Scikit, statmodels and seaborn – graph plotting using Plotly – interactive data visualization using Bokeh.

<b>Guidelines for Continuous Assessment of Tutorial</b>		
<b>Sr. No.</b>	<b>Components for Continuous Assessment</b>	<b>Marks Allotted</b>
1	Mini Project - 1	10
2	Tutorial assignment - 6	15

<b>List of Tutorial Assignments</b>		
<b>Sr. No.</b>	<b>Title</b>	<b>CO Mapped</b>
1	Case study for Data Preparation and processing	CO1
2	Assignment based on use of Libraries	CO2, CO4
3	Assignment based on Importing Packages	CO2, CO4
4	Plotting of graphs using Matplotlib	CO3, CO3
5	Use of package Scikit, Seaborn	CO3
6	Assignment based on use of Statmodels	CO3

### List of Laboratory Experiments / Assignments

Sr. No.	Laboratory Experiments / Assignments	CO Mapped
1	Demonstrate program creation in Python through usage of appropriate constructs and OOPs concepts.	CO1, CO2
2	Apply the concepts of data structures and string functions in python program.	CO3
3	Apply the concepts of file handling and exception handling	CO4
4	Evaluate and visualize the data using appropriate python libraries.	CO5
5	Develop GUI based applications with database connectivity in Python.	CO6

#### Guidelines for Laboratory Conduction

1. Use of open source software is encouraged.
2. Based on the concepts learned, instructor will ensure mini-project development by the students
3. Instructor should identify and set one assignment beyond the scope of syllabus.
3. Operating System recommended :- Windows / Open source Linux or its derivative

#### Guidelines for Student's Lab Journal

1. The laboratory assignments are to be submitted by student in the form of journal.
2. Journal consists of certificate, table of contents, and handwritten write-up of each assignment (Title, Objectives, Problem Statement, Outcomes, Date of Completion, assessor's sign, Theory-Concept in brief, algorithm, flowchart, conclusion.).
3. Program codes with sample output of all performed assignments are to be submitted as softcopy.
4. Course in-charge is highly encouraged to maintain softcopy of all the students assignments

#### Guidelines for Term work Assessment

Continuous assessment of laboratory work is done based on overall performance of student. Each lab assignment assessment will assign marks based on rubrics. Suggested rubrics for overall assessment include-

Sr. No.	Components for Continuous Assessment	Marks Allotted
1	R1: Timely Submission	10
2	R2: Understanding	10
3	R3: Clarity of Journal Writing	10
<b>Total Marks:</b>		<b>30</b>
Each assignment will get 30 marks. Average of all assignments is converted in to total TW marks

<b>F. Y. M.C.A. Pattern 2022 Semester: I MCA221007: Business Communication</b>			
<b>Teaching Scheme:</b>	<b>Credit Scheme:</b>	<b>Examination Scheme:</b>	
<b>Practical : 02 hrs/week</b>	<b>01</b>	<b>TermWork: 25Marks</b>	
<b>Prerequisite Courses, if any: -Nil</b>			
<b>Course Objectives:</b>			
10. To facilitate holistic growth			
11. To make the students aware, about the importance, the role and the content of business communication skills			
12. To develop the ability of effective communication through individual and group activities			
13. To expose students to right attitudinal and behavioral aspects and to build the same through various activities			
<b>Course Outcomes:</b> On completion of the course, students will be able to–			
	<b>Course Outcomes</b>	<b>Bloom's Level</b>	
<b>CO1</b>	Express effectively through verbal/oral communication	3-Apply	
<b>CO2</b>	Apply leadership and interpersonal skills.	3-Apply	
<b>CO3</b>	Apply ethics and etiquettes in IT Profession	3-Apply	
<b>CO4</b>	Write precise reports and technical documents	6-Create	
<b>COURSE CONTENTS</b>			
<b>Unit I</b>	<b>Verbal and Nonverbal Communications</b>	<b>03hrs</b>	<b>COs Mapped - CO1</b>
planning, preparation, delivery and feedback and assessment of activities like: Public speaking, Group Discussions, Oral Presentation skills, Perfect interview, listening and observation skills, Body Language, Use of presentation graphics, Use of presentation aids, study of Communication Barriers			
<b>Unit II</b>	<b>Written Communications</b>	<b>03hrs</b>	<b>COs Mapped – CO4</b>
Written Communications: Technical Writing – Technical reports, Project Proposals, Technical Articles, Technical Manuals, Newsletters. Official / Business Correspondence: Business Letters, Memos, Progress Reports, Minutes of Meeting, Event Reporting, Use of Style, Grammar and Vocabulary for effective Technical writing, Use of Tools, Guidelines for technical Writing and Publication			
<b>Unit III</b>	<b>Leadership and Interpersonal Communications</b>	<b>03hrs</b>	<b>COs Mapped – CO2,CO3</b>
Leaders – their skills, roles, and responsibilities, Vision, Empowering, delegation, motivating others, organizational skills, Problem Solving and conflict management, team building, interpersonal skills. Organizing and conducting meetings, decision making, giving support			
<b>Unit IV</b>	<b>Ethics and Etiquettes</b>	<b>03hrs</b>	<b>COs Mapped – CO3</b>
Business Ethics, Etiquettes in social as well as office settings, E-mail etiquettes, Telephone Etiquettes, and ethics as an IT Professional, Civic Sense			
<b>Text Books</b>

CO4	-	-	-	-	-	3	1	-	3	1	3	3

<b>List of Laboratory Experiments / Assignments</b>		
<b>Sr. No.</b>	<b>Laboratory Experiments / Assignments</b>	<b>CO Mapped</b>
1	Students should select any one topic from following ideas and present: a. Book review. b. Biographical sketch. c. Any topic such as an inspirational story/personal values/beliefs/current topic	CO1,CO2, CO3
2	Students will present to a group from following ideas: a. Multimedia based oral presentation on any topic of choice (Business/Technical). b. Public speaking exercise in the form of debate or elocution on any topic of choice	CO1,CO2, CO3
3	Students will undergo two activities related to verbal/nonverbal skills from following: a. Appearing for mock personal interviews. b. Participating in Group Discussions on current affairs/social issues/ethics and etiquettes. c. Participating in Games, Role Playing exercises to highlight nonverbal skills	CO1,CO2, CO3
4	Students will submit two written technical documents from following: a. Project proposal. b. Product brochure. c. Literature survey on any one topic. d. User manual.	CO1,CO2, CO4
5	Students will submit one written business documents from following: a. A representative Official correspondence. b. Minutes of meeting. c. Work progress report	CO1,CO2, CO4
6	Students will participate in two activities from following: a. Team games for team building. b. Situational games for Role Playing as leaders, members. c. Organizing mock events. d. Conducting meetings	CO1,CO2, CO4
<b>Guidelines for Laboratory Conduction</b>		
Multiple set of activity based assignments can be prepared and distributed among batches. Every student must be given adequate opportunity to participate actively in each activity. An exercise can be designed to allow multiple skills exposure for example a group task encouraging discussions, team building, value sharing, leadership and role play.		
<b>Guidelines for Student's Lab Journal</b>		
The student must prepare the journal in the form of report elaborating the activities performed. Students must submit the report of all conducted activities conducted. The brief guidelines for report preparations are as follows: 1. One activity report must be of maximum 3 pages; 2. Combined Report of all activities with cover pages, table of contents and certificate (signed by instructor) is to be submitted in hardcopy format only. 3. The report must contain: • General information about the activity		

- Define the purpose of the activity
- Summarize the process (methods) during the activities
- Describe what you learned (outcomes) during the activities as a student

#### **Guidelines for Term work Assessment**

Continuous assessment of laboratory work is done based on overall performance of student. Suggested parameters for overall assessment as well as each Laboratory assignment assessment include- timely completion of assignment, performance, punctuality, neatness, enthusiasm, participation and contribution in various activities- presentations, team activity, group discussion, Group exercises and interpersonal skills and similar other activities/assignments and Well presented, timely and complete report. Recommended Assessment and Weightage Parameters: (Attendance 30%, Assignments/activities-Active participation and proactive learning 50% and report 20%)

<b>F. Y. M.C.A. Pattern 2022 Semester: II MCA222001: Object Oriented Programming</b>			
<b>Teaching Scheme:</b>	<b>Credit Scheme:</b>	<b>Examination Scheme:</b>	
<b>Theory : 04 hrs/week Practical: 04 hrs/week</b>	<b>04 02</b>	<b>InSem Exam: 20Marks Continuous Comprehensive Evaluation: 20Marks EndSem Exam: 60Marks Practical Exam: 50 Marks Termwork: 50 Marks</b>	
<b>Prerequisite Courses, if any: Nil</b>			
<b>Course Objectives:</b>			
14. To learn the syntax and semantics of the C++ and Java programming language.			
15. To understand object-oriented paradigm such as data abstraction, encapsulation, inheritance, dynamic binding, and polymorphism.			
16. To study Java SDK environment to create, debug and run simple Java programs.			
17. To learn generic classes with C++ templates and how to use exception handling in C++ programs.			
<b>Course Outcomes:</b> On completion of the course, students will be able to–			
	<b>Course Outcomes</b>	<b>Bloom's Level</b>	
<b>CO1</b>	Illustrate the fundamental programming structures	2-Understand	
<b>CO2</b>	Explain multithreading and exception handling	2-Understand	
<b>CO3</b>	Demonstrate inheritance and polymorphism	3-Apply	
<b>CO4</b>	Design Applet and java application using AWT	3-Apply	
<b>CO5</b>	Implement class, interface and package	3-Apply	
<b>COURSE CONTENTS</b>			
<b>Unit I</b>	<b>Basics of Programming</b>	<b>08hrs</b>	<b>COs Mapped - CO1 , CO5</b>
Concept of Object Oriented Programming, Difference between C & C++. OOP and its advantages. Standard input and standard output operators. Defining Classes in C++, data members & member function, instantiating and using Classes. Exception Handling, Constructor and Destructor - Using Constructors, Multiple Constructors and Initialization, Copy Constructor, Using Destructor to Destroy Instances			
<b>Unit II</b>	<b>Inheritance and Polymorphism</b>	<b>10hrs</b>	<b>COs Mapped - CO1, CO3, CO5</b>
Inheritance and Polymorphism - Defining Base and Derived Classes. Access Modifiers – private, public and protected. Overloading and Overriding, Operator Overloading (arithmetic operators only) Virtual Function & Polymorphism, Friend Function, Static Function, this pointer			
<b>Unit III</b>	<b>Java as Object Oriented Programming Language- Overview</b>	<b>08hrs</b>	<b>COs Mapped - CO1, CO5</b>
Features of Java, the Java Programming environment – (JDK, command line tools), Fundamental Programming structures in Java, Class, Object, Using predefined classes, Defining your own classes, constructors, static data member and methods, inner classes and anonymous classes, introduction to			

interface, its structure and implementation.			
<b>Unit IV</b>	<b>Inheritance and Multithreading in Java</b>	<b>10hrs</b>	<b>COs Mapped - CO1, CO3,CO5</b>
Inheriting variables and methods in class, inheritance and constructors, abstract class and final class, object wrapper and autoboxing, inheritance and interfaces, introduction to packages, introduction to Multithreading, life cycle of a thread, thread states, thread properties, methods in Threads and Runnable, setting priority of threads, synchronization and inter thread communication, introduction to exception handling, predefined and user defined exceptions.			
<b>Unit V</b>	<b>Applet ,AWT and Swing</b>	<b>12hrs</b>	<b>COs Mapped – CO4, CO5</b>
Introduction to applet, life cycle of applet, development and execution of simple applet, drawing simple geometry shapes in applet, Introduction to AWT, events, listeners, event handling methods, a small application to demonstrate use of controls – label, button, check box, text, radio button, layout. Introduction to swing, difference between swing and AWT, Japplet class, icons, small application using Jlablecontrol, JTextField, Jbutton, Jcheckbox, Jcombobox, Jradiobutton.

<b>Guidelines for Continuous Comprehensive Evaluation of Theory Course</b>		
<b>Sr. No.</b>	<b>Components for Continuous Comprehensive Evaluation</b>	<b>Marks Allotted</b>
1	Quiz – 1 on unit 3 and 4	5 Marks
2	Assignment – 1 on unit 1,2,3 Assignment – 1 on unit 4,5	5 Marks
3	Micro Project - 1	10 Marks

<b>List of Laboratory Experiments / Assignments</b>		
<b>Sr. No.</b>	<b>Laboratory Experiments / Assignments</b>	<b>CO Mapped</b>
1	Create a class named weather report that holds a daily weather report with data members day_of_month, hightemp, lowtemp, a mount_rain and amount_snow. Use different types of constructors to initialize the objects. Also include a function that prompts the user and sets values for each field so that you can override the default values. Write a menu driven program in C++ with options to enter data and generate monthly report that displays average of each attribute.	CO1, CO5
2	A Book shop maintains the inventory of books that are being sold at the shop. The list includes details such as title, author, publisher, price and available stock. Write a program in C++ which will have a class called books with suitable member functions for <ul style="list-style-type: none"> <li>i. Add</li> <li>ii. Update</li> <li>iii. Search a book</li> <li>iv. Purchase a book (update the stock and display the total cost)</li> <li>v. Record number of successful/unsuccessful transactions (use static data members to keep count of transactions) Use new operator in constructors to allocate memory space required.</li> </ul>	CO1, CO5
3	Design a base class with name, date of birth, blood group and another base class consisting of the data members such as height and weight. Design one more base class consisting of the insurance policy number and contact address. The derived class contains the data members' telephone numbers and driving license number. Write a menu driven program to carry out the following things: i. Build a master table ii. Display iii. Insert a new entry iv. Delete entry v. Edit vi. Search for a record	CO1, CO2, CO3, CO5
4	Design a class 'Complex' with data members for real and imaginary part. Provide default and parameterized constructors. Write a program to perform arithmetic operations of two complex numbers using operator overloading. <ul style="list-style-type: none"> <li>i. Addition and subtraction using friend functions</li> <li>ii. Multiplication and division using member functions</li> </ul>	CO1, CO5
5	Write a program in Java with class Rectangle with the data fields width, length, area and colour. The length, width and area are of double type and colour is of string type. The methods are get_length(), get_width(), get_colour() and find_area(). Create two objects of Rectangle and compare their area and colour. If the area and colour both are the same for the objects then display "Matching Rectangles", otherwise display "Non-matching Rectangle".	CO1, CO5
6	Write a program in Java to implement a Calculator with simple arithmetic operations such as add, subtract, multiply, divide, factorial etc. using switch case and other simple java statements. The objective of this assignment is to learn Constants, Variables, and Data Types, Operators and Expressions, Decision making statements in Java.	CO1, CO5
7	Write a program in Java to create a player class. Inherit the classes Cricket_player, Football_player and Hockey_player from player class. The objective of this assignment is to learn the concepts of inheritance in Java.	CO1, CO3, CO5

8	Create an applet with three text Fields and four buttons add, subtract, multiply and divide. User will enter two values in the Text Fields. When any button is pressed, the corresponding operation is performed and the result is displayed in the third Text Fields.	CO1, CO4, CO5
9	Write a java program to create User defined exception to check the following conditions and throw the exception if the criterion does not meet. (a) User has age between 18 and 55 (b)User stays has income between Rs.50,000 – Rs. 1,00,000 per month (c) User stays in Pune/ Mumbai/ Bangalore / Chennai (d)User has 4-wheeler Accept age, Income, City, Vehicle from the user and check for the conditions mentioned above. If any of the condition not met then throw the exception.	CO1, CO2, CO5
10	Implement Java program to implement a base class consisting of the data members such as name of the student, roll number and subject. The derived class consists of the data members subject code, internal assessment and university examination marks. The program should have the facilities. i) Build a master table ii) List a table iii) Insert a new entry iv) Delete old entry v) Edit an entry vi) Search for a record. Use virtual functions.	CO1,CO3, CO5
11	Write a program to create multiple threads and demonstrate how two threads communicate with each other.	CO1,CO2, CO5
12	A Mini project in Java: A group of 4 students can develop a small application in Java.	CO1,CO2, CO3,CO4, CO5

#### **Guidelines for Laboratory Conduction**

1. Use of open source software is encouraged.
2. Based on the concepts learned, instructor will ensure mini-project development by the students
3. Instructor should identify and set one assignment beyond the scope of syllabus.
3. Operating System recommended :- Windows / Open source Linux or its derivative

#### **Guidelines for Student's Lab Journal**

1. The laboratory assignments are to be submitted by student in the form of journal.
2. Journal consists of certificate, table of contents, and handwritten write-up of each assignment (Title, Objectives, Problem Statement, Outcomes, Date of Completion, assessor's sign, Theory-Concept in brief, algorithm, flowchart, conclusion.).
3. Program codes with sample output of all performed assignments are to be submitted as softcopy.
4. Course in-charge is highly encouraged to maintain softcopy of all the students assignments

#### **Guidelines for Term work Assessment**

Continuous assessment of laboratory work is done based on overall performance of student. Each lab assignment assessment will assign marks based on rubrics. Suggested rubrics for overall assessment include-

Sr. No.	Components for Continuous Assessment	Marks Allotted
1	R1: Timely Submission	10
2	R2: Understanding	10
3	R3: Clarity of Journal Writing	10
<b>Total Marks:</b>		<b>30</b>

Each assignment will get 30 marks. Average of all assignments is converted in to total TW marks

Introduction: Database Concepts, View of Data, Database System Architecture, Data Models, Database Design, ER Model: Entity, Attributes, Relationships, Constraints, Keys, ER Diagram, Design Issues, Extended E-R Features, converting E-R & EER diagram into tables, Relational Model: Database Schema, Keys, Relational Algebra			
<b>Unit II</b>	<b>SQL And PL/SQL</b>	<b>08hrs</b>	<b>COs Mapped - CO4</b>
SQL: Characteristics and advantages, SQL Data Types and Literals, DDL, DML, SQL Operators, Tables: Creating, Modifying, Deleting, Indexes, SQL DML Queries: SELECT Query and clauses, Database Modification using SQL Insert, Update and Delete Queries, Set Operations, Predicates and Joins, Set membership, Tuple Variables, Set comparison, Ordering of Tuples, Aggregate Functions, Nested Queries, Views: Creating, Dropping, Updating using Views, PL/SQL: concept of Stored Procedures & Functions, Cursors, Triggers, Assertions, roles and privileges			

<b>Unit III</b>	<b>Relational Database Design</b>	<b>07hrs</b>	<b>COs Mapped – CO3</b>
<p><b>Relational Model:</b> Basic concepts, Attributes and Domains, CODD's Rules  <b>Relational Integrity:</b> Domain, Referential Integrities, Enterprise Constraints  <b>Database Design:</b> Features of Good Relational Designs, Normalization, Atomic Domains and First Normal Form, Decomposition using Functional Dependencies, Algorithms for Decomposition, 2NF, 3NF, BCNF</p>			
<b>Unit IV</b>	<b>Database Transactions and Query Processing</b>	<b>07hrs</b>	<b>COs Mapped – CO2</b>
<p><b>Database Transactions:</b>  Transaction concepts, ACID properties , Concept of Schedule, Conflict Serializability, View serializability , Cascadeless Schedules, Recoverable and Non recoverable Schedules, Concurrency Control: Lock-Based Protocols, Deadlock Handling, Timestamp-Based Protocols, Recovery methods : Shadow-Paging and Log-Based Recovery, Checkpoints  <b>Query Processing :</b> Query Processing, Query Optimization</p>			
<b>Unit V</b>	<b>Advanced Databases</b>	<b>07hrs</b>	<b>COs Mapped – CO5</b>
<p>Database Architectures: Centralized and Client-Server Architectures, 2 Tier and 3 Tier Architecture  Introduction: Parallel Databases, Distributed Databases, NoSQL Database, Architecture : Parallel Databases and Distributed Databases, Types and examples of NoSQL Database- Key value store, document store, graph, CAP theorem and BASE Properties, Comparative study of SQL and NoSQL</p>			
<b>Text Books</b>

CO5	3	2	2	1	3	-	-	-	1	-	-	1

<b>Guidelines for Continuous Comprehensive Evaluation of Theory Course</b>		
<b>Sr. No.</b>	<b>Components for Continuous Comprehensive Evaluation</b>	<b>Marks Allotted</b>
1	Open Book Test – 1 on unit 3 and 4	10
2	Quiz – 1 on unit 5	05
3	Assignments – 1 on unit 1,2,3 Assignments –2 on unit 4,5	05

<b>List of Laboratory Experiments / Assignments</b>		
<b>Sr. No.</b>	<b>Laboratory Experiments / Assignments</b>	<b>CO Mapped</b>
1	Design any database with at least 4 entities and relationships between them. Draw suitable ER/EER diagram for the system.	CO1
2	Implement SQLDDL statements which demonstrate the use of SQL objects such as Table, View, Index, Sequence, different constraints etc with suitable example	CO1,CO4, CO3
3	Write at least 10 SQL queries on the suitable database application using SQL DML statements: Insert, Select, Update, Delete with operators(Arithmetic Operators, Logical Operators, Comparison Operator, Special Operator), functions (Number function, Aggregate Function, Character Function, Conversion Function, Date Function)	CO1,CO4, CO3
4	Implement Group By, Having clause and Order by clause with suitable example.	CO1,CO4, CO3
5	Design at least 10 SQL queries for suitable database application using SQL DML statements: all types of Join, Sub-Query and View.	CO1,CO4, CO3
6	<p>Study &amp; Implementation of PL/SQL</p> <p>Create table student(<u>Rollno</u>, name, percentage). Insert suitable records in the table.</p> <p>Write a PL/SQL block of code for the following requirements:-</p> <ul style="list-style-type: none"> <li>• Accept rollno from user</li> <li>• Retrieve name and percentage of the students with rollno given by user.</li> <li>• calculate grade of that student as per follows  Percentage &gt;=80 then grade=A+  Percentage &gt;=70 and &lt;80 then grade=A  Percentage &gt;=60 and &lt;70 then grade=B+  Percentage &gt;=50 and &lt;60 then grade=B  Percentage &gt;=40 and &lt;50 then grade=C  Percentage below 40 then grade = fail</li> <li>• print rollno, name, percentage and grade of student</li> </ul> <p>use appropriate control structure and exception handling</p>	CO1,CO4, CO3
7	<p>Write a PL/SQL block for following requirement and handle the exceptions.</p> <p>Roll no. of student will be entered by user. Attendance of roll no. entered by user will be checked in Student table. If attendance is less than 75% then display the message “Term not granted” and set the status in Student table as “D”. Otherwise display message “Term granted” and set the status in Student table as “ND”</p>	CO1,CO4, CO3

8	Study & Implementation of SQL Cursors. Consider following Employee schema. Employee(ID, Name, Age, Address, Salary) Write a PL/SQL block to increase salary of those employees having minimum salary by 5000. Display count of employees who got hike in salary. (use implicit cursor)	CO1,CO4, CO3
9	Write an explicit cursor to i) display employee name, address ,salary along with age category (young or old) ii) display count of young and old employees	CO1,CO4, CO3
10	Write a PL/SQL block to calculate gross salary on basis of basic salary. If DA is 40% of basic ,HRA is 20% of basic and PF deduction is 12% of basic salary. Gross salary=Basic Salary+DA+HRA-PF Accept basic salary from user and pass it to function, function will return gross salary	CO1,CO4, CO3
11	Create a transparent audit system for a table Employees using trigger. The system must keep track of the records that are being deleted or updated. When a record is deleted or modified in a employee table, employee id and and the date of operation are stored in the audit table, then the delete or update operation is allowed to go through	CO1,CO4, CO3
12	Study of Open Source NOSQL Database: MongoDB , Installation of MongoDB Create database in MongoDB , Create a collection named student , Insert 5 records with field (Student_ number, Name, Address , contact_number , subjects and percentage ). 1) Insert 1 more document in collection with additional field of hobbies. 2) Display information of all students 3) Display details of students who have secured more than 70 percentage 4) Update percentage of student whose Student _ number is 5 5) Delete document of 'Rohan' from database 6) Demonstrate use of Save() Method	CO5
13	Design and Develop MongoDB Queries using aggregation and indexing with suitable example using MongoDB	CO5

### **Guidelines for Laboratory Conduction**

1. Use of open source software is encouraged.
2. Based on the concepts learned, instructor will ensure mini-project development by the students
3. Instructor should identify and set one assignment beyond the scope of syllabus.
3. Operating System recommended :- Windows / Open source Linux or its derivative

### **Guidelines for Student's Lab Journal**

1. The laboratory assignments are to be submitted by student in the form of journal.
2. Journal consists of certificate, table of contents, and handwritten write-up of each assignment (Title, Objectives, Problem Statement, Outcomes, Date of Completion, assessor's sign, Theory-Concept in brief, algorithm, flowchart, conclusion.).
3. Program codes with sample output of all performed assignments are to be submitted as softcopy.
4. Course in-charge is highly encouraged to maintain softcopy of all the students assignments

### **Guidelines for Term work Assessment**

Continuous assessment of laboratory work is done based on overall performance of student. Each lab assignment assessment will assign marks based on rubrics. Suggested rubrics for overall assessment include-

<b>Sr. No.</b>	<b>Components for Continuous Assessment</b>	<b>Marks Allotted</b>
1	R1: Timely Submission	10
2	R2: Understanding	10
3	R3: Clarity of Journal Writing	10
<b>Total Marks:</b>		<b>30</b>
Each assignment will get 30 marks. Average of all assignments is converted in to total TW marks

(Autonomous from Academic Year 2022-23)**

<b>F. Y. M.C.A. Pattern 2022 Semester: II MCA222003A: Elective I : Artificial Intelligence</b>			
<b>Teaching Scheme:</b>	<b>Credit Scheme:</b>	<b>Examination Scheme:</b>	
<b>Theory : 03 hrs/week Practical : 02 hrs/week</b>	<b>03 01</b>	<b>InSem Exam: 20Marks Continuous Comprehensive Evaluation: 20Marks EndSem Exam: 60Marks TermWork:25Marks -</b>	
<b>Prerequisite Courses, if any:</b> Discrete Mathematics , Data Structure and Algorithms			
<b>Course Objectives:</b> 23. To introduce basic principles, approaches and application of artificial intelligence. 24. To develop basic understanding of building block of artificial intelligence in terms of intelligent agents and knowledge representations. 25. To learn various types of search algorithm useful for artificial intelligence. 26. To develop understanding of planning and learning methods. 27. To understand Natural Language Processing and Expert systems.			
<b>Course Outcomes:</b> On completion of the course, students will be able to–			
	<b>Course Outcomes</b>	<b>Bloom's Level</b>	
<b>CO1</b>	Describe fundamental concepts of artificial intelligence	1-Knowledge	
<b>CO2</b>	Apply basic principles to find solutions that require problem solving	3-Apply	
<b>CO3</b>	Use the core concepts of knowledge for decision making methods	3-Apply	
<b>CO4</b>	Use AI techniques for Logical Planning and explain learning methods	3-Apply	
<b>CO5</b>	Analyze the structures and algorithms of a techniques related to language processing and explain expert systems	4-Analyze	
<b>COURSE CONTENTS</b>			
<b>Unit I</b>	<b>Introduction to Artificial Intelligence</b>	<b>07hrs</b>	<b>COs Mapped - CO1</b>
Introduction to Intelligent systems, What is Artificial Intelligence, Foundations of AI, History of AI, Applications of AI, AI representation, Intelligent agent - Environment, characteristics, behaviour, concept of Rationality, structure of agents.			
<b>Unit II</b>	<b>Search Techniques</b>	<b>08hrs</b>	<b>COs Mapped – CO2</b>
Solving Problems by Searching: Study and analysis of various searching algorithms. Uninformed Search Strategies: Breadth-first search, Uniform-cost search, Depth-first search, Depthlimited search, Iterative deepening depth-first search, Bidirectional search Informed (Heuristic) Search Strategies: Greedy best first search A* search: Minimizing the total estimated solution cost, Conditions for optimality: Admissibility and consistency, Optimality of A*, Heuristic Functions, Hill climbing, Constraint satisfaction problem.			
<b>Unit III</b>	<b>Knowledge Representation</b>	<b>07hrs</b>	<b>COs Mapped – CO3</b>

Definition of knowledge, properties for knowledge representation system, predicate calculus-connectives, variables and quantification, Predicates and arguments, ISA hierarchy, Introduction to non-monotonic logic, TMS(truth maintenance system), Statistical and probabilistic reasoning

<b>Unit IV</b>	<b>Planning and Learning Methods</b>	<b>07hrs</b>	<b>COs Mapped – CO4</b>
----------------	--------------------------------------	--------------	-------------------------

**Planning:** Introduction : Search in planning, search vs planning, planning as problem solving, components of a planning, Forward planning, Nonlinear planning using constraint posting, Hierarchical planning.

**Learning:** Introduction, Learning methods, Introduction to Neural Networks, Working of a Neuron, The basic components of ANN, Issues related to Neural computation, Feedforward Networks, Backpropagation Algorithm, Applications of Neural Networks

<b>Unit V</b>	<b>Natural language processing and Expert systems</b>	<b>07hrs</b>	<b>COs Mapped – CO5</b>
---------------	---	--------------	-------------------------

**Natural Language Processing:** Language Models, Steps in NLP, Syntactic Analysis (Parsing), Semantic interpretation, Discourse and pragmatic Processing, Text Classification. Discourse and pragmatic Processing, Implementation aspects of Syntactic Analysis (Parsing)

**Expert Systems:** What is Expert system, Utilization and functionality of Expert system, Architecture of Expert system, Components of Expert system, Case study based on Expert System

**Text Books**

<b>Theory : 03 hrs/week Practical: 02 hrs/week</b>	<b>03 01</b>	<b>InSem Exam: 20Marks Continuous Comprehensive Evaluation: 20Marks EndSem Exam: 60Marks TermWork: 25Marks</b>	
<b>Prerequisite Courses, if any: Discrete Mathematics, Data Structure and Algorithm</b>			
<b>Course Objectives:</b> 28. To Understand fundamentals of Information Retrieval 29. To learn performance evolution metric for IR 30. To study modeling and retrieval evaluation			
<b>Course Outcomes:</b> On completion of the course, students will be able to–			
	<b>Course Outcomes</b>	<b>Bloom's Level</b>	
<b>CO1</b>	Describe the concept of Information retrieval	1-Remember	
<b>CO2</b>	Define the standard methods for Web indexing and retrieval	1-Remember	
<b>CO3</b>	Execute retrieval process of text and multimedia data	3-Apply	
<b>CO4</b>	Demonstrate performance of any information retrieval system.	3-Apply	
<b>Unit I</b>	<b>Introduction</b>	<b>07hrs</b>	<b>COs Mapped - CO1</b>
<b>Introduction to Information Retrieval:</b> Goals and history of IR, Components of an IR system, Early Developments – The IR Problem , Information versus Data Retrieval, The Software Architecture of the IR System, The nature of unstructured and semi-structured text, Inverted index and Boolean queries.			
<b>Unit II</b>	<b>Text Indexing, Storage and Compression</b>	<b>07hrs</b>	<b>COs Mapped - CO1, CO3</b>
Text encoding: tokenization, stemming, stop words, phrases, index optimization. Index compression: lexicon compression and postings, Lists compression. Gap encoding, gamma codes, Zipf's Law. Index construction. Postings size estimation, merge sort, dynamic indexing, positional indexes, n-gram indexes, real-world issues.			
<b>Unit III</b>	<b>Modeling and Retrieval Evaluation</b>	<b>08hrs</b>	<b>COs Mapped – CO3</b>
Basic IR Models , Boolean Model ,TF-IDF (Term Frequency/Inverse Document Frequency) Weighting, Vector Model , Probabilistic Model , Latent Semantic Indexing Model , Neural Network Model , Retrieval Evaluation , Retrieval Metrics , Precision and Recall , Reference Collection , User-based Evaluation , Relevance Feedback and Query Expansion , Explicit Relevance Feedback.			
<b>Unit IV</b>	<b>Web Mining</b>	<b>07hrs</b>	<b>COs Mapped – CO2</b>

Web Structure, content and usage mining, Web Crawling, Indexes, Search engines; spidering; metacrawlers; directed spidering; link analysis (e.g. hubs and authorities, Google PageRank), Information Extraction, spam filtering, XML retrieval.			
<b>Unit V</b>	<b>Performance metrics</b>	<b>07hrs</b>	<b>COs Mapped – CO4</b>
Recall, precision, and F-measure; Evaluations on benchmark text collections, TREC Tracks. Social Networks : Social Web, Blogs, Wikis, Forums, Social Network analysis, Recommender systems, Information Filtering, Collaborative filtering and content-based recommendation of documents and products.			
<b>Text Books</b>

<b>List of Laboratory Experiments / Assignments</b>																	
<b>Sr. No.</b>	<b>Laboratory Experiments / Assignments</b>	<b>CO Mapped</b>															
1	Installation of Unity and Visual Studio, setting up Unity for VR development, understanding documentation of the same	CO3															
2	Demonstration of the working of HTC Vive, Google Cardboard, Google Daydream and Samsung gear VR.	CO3															
3	Develop a scene in Unity that includes: i. a cube, plane and sphere, apply transformations on the 3 game objects. ii. add a video and audio source	CO4															
4	Develop a scene in Unity that includes a cube, plane and sphere. Create a new material and texture separately for three Game objects. Change the colour, material and texture of each Game object separately in the scene. Write a C# program in visual studio to change the colour and material/texture of the game objects dynamically on button click.	CO4															
5	Develop a scene in Unity that includes a sphere and plane. Apply Rigid body component, material and Box collider to the game Objects. Write a C# program to grab and throw the sphere using VR controller.	CO4															
6	Develop a simple UI(User interface ) menu with images, canvas, sprites and button. Write a C# program to interact with UI menu through VR trigger button such that on each successful trigger interaction display a score on scene.	CO4															
<b>Guidelines for Laboratory Conduction</b>																	
1. Use of open source software is encouraged. 2. Based on the concepts learned, instructor may also set one assignment or mini-project beyond the scope of syllabus. 3. Operating System recommended :- Windows / Open source Linux or its derivative																	
<b>Guidelines for Student's Lab Journal</b>																	
1. The laboratory assignments are to be submitted by student in the form of journal. 2. Journal consists of certificate, table of contents, and handwritten write-up of each assignment (Title, Objectives, Problem Statement, Outcomes, Date of Completion, assessor's sign, Theory-Concept in brief, algorithm, flowchart, conclusion.). 3. Program codes with sample output of all performed assignments are to be submitted as softcopy. 4. Use of DVD containing students programs maintained by course in-charge is highly encouraged.																	
<b>Guidelines for Term work Assessment</b>																	
Continuous assessment of laboratory work is done based on overall performance of student. Each lab assignment assessment will assign marks based on rubrics. Suggested rubrics for overall assessment include-																	
<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 15%;">Sr. No.</th> <th style="width: 60%;">Components for Continuous Assessment</th> <th style="width: 25%;">Marks Allotted</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>R1: Timely Submission</td> <td>10</td> </tr> <tr> <td>2</td> <td>R2: Understanding</td> <td>10</td> </tr> <tr> <td>3</td> <td>R3: Clarity of Journal Writing</td> <td>10</td> </tr> <tr> <td colspan="2" style="text-align: right;"><b>Total Marks:</b></td> <td><b>30</b></td> </tr> </tbody> </table>			Sr. No.	Components for Continuous Assessment	Marks Allotted	1	R1: Timely Submission	10	2	R2: Understanding	10	3	R3: Clarity of Journal Writing	10	<b>Total Marks:</b>		<b>30</b>
Sr. No.	Components for Continuous Assessment	Marks Allotted															
1	R1: Timely Submission	10															
2	R2: Understanding	10															
3	R3: Clarity of Journal Writing	10															
<b>Total Marks:</b>		<b>30</b>															
Each assignment will get 30 marks. Average of all assignments is converted in to total TW marks																	

**K.K.Wagh Institute of Engineering Education and Research, Nashik  
(Autonomous from Academic Year 2022-23)**

<b>F. Y. M.C.A. Pattern 2022 Semester: II MCA222004: Advanced Web Technology</b>			
<b>Teaching Scheme:</b>	<b>Credit Scheme:</b>	<b>Examination Scheme:</b>	
<b>Theory :03 hrs/week Practical : 02 hrs/week</b>	<b>03 01</b>	<b>InSem Exam: 20Marks Continuous Comprehensive Evaluation: 20Marks EndSem Exam:60Marks TermWork: 25Marks</b>	
<b>Prerequisite Courses, if any: Web Technology</b>			
<b>Course Objectives:</b>			
1. To introduce the basic concepts of angular Js. 2. To become familiar with ReactJs and Node.js 3. To learn the Express.js for building the web applications 4. To introduce students with Firebase concepts and their real life uses			
<b>Course Outcomes:</b> On completion of the course, students will be able to–			
	<b>Course Outcomes</b>	<b>Bloom's Level</b>	
<b>CO1</b>	Explain the feature of ECMAScript6	2-Understand	
<b>CO2</b>	Identify the runtime environment that provides the foundation for creating and running an application	2-Understand	
<b>CO3</b>	Write a single page, multi-page, or hybrid web applications using Express.js	3-Apply	
<b>CO4</b>	Use ReactJs in real life scenario	3-Apply	
<b>CO5</b>	Design modern database platforms that are reliable, practical, and scalable for application developers	3-Apply	
<b>COURSE CONTENTS</b>			
<b>Unit I</b>	<b>ECMAScript 6</b>	<b>07hrs</b>	<b>COs Mapped - CO1</b>
The let keyword, The const keyword, Arrow Functions, For/of, Map Objects, Set Objects, Classes, Promises, Default Parameters, Function Rest Parameter, Arrays methods , New Math Methods, New Number Properties, New Number Methods, New Global Methods, Object entries, JavaScript Modules			
<b>Unit II</b>	<b>Node.js</b>	<b>07hrs</b>	<b>COs Mapped – CO2</b>
Introduction to Node.js: advantages of Node.js, traditional web server model, Node.js process model , setup Dev Environment, Node.js Modules: Functions, Buffer, Module, Module Types, Core Modules, Local Modules, Module.Exports, Node Package Manager, Built-in Modules, HTTP module, File Module, Events, creating web server			
<b>Unit III</b>	<b>ExpressJS</b>	<b>08hrs</b>	<b>COs Mapped – CO3</b>
Basics of ExpressJS , Restful services, Introducing Express, Building your First Web Server, Nodemon, Environment Variables, Route Parameters, Handling HTTP GET Request, Handling HTTP POST			

Request , Calling Endpoints Using Postman, Input Validations, Handling HTTP PUT Request, Handling HTTP DELETE Request ,Project- Build the Genres API			
<b>Unit IV</b>	<b>ReactJs</b>	<b>07hrs</b>	<b>COs Mapped – CO3</b>
Work flow of ReactJs, Scope of ReactJs, Advantages of ReactJs, React Components overview, Containers and components, ReactJs Environment Setups, Best IDE for ReactJs, Write optimized code in ReactJs, ReactJs browser plugins overview, Use of ReactJs forms and UI			
<b>Unit V</b>	<b>Database connectivity with MongoDB and Firebase</b>	<b>07hrs</b>	<b>COs Mapped – CO5</b>
<b>MongoDB:</b> Basic Database Skills, Databse Drivers - Mongoose, MongoDB compass, MongoDB Concepts, MongoDB CRUD Operations			
<b>Firestore Basic:</b> <i>Read Data, Write the data, Query the Data, Indexing Data, Firestore Development Environment and Authorization and Validation</i>			
<b>TextBooks</b>			
<ol style="list-style-type: none"> <li>1. Mehul Mohan, “Advanced Web Development With React”</li> <li>2. Mario Casciaro, “Node.js Design Patterns: Design and implement production-grade Node.js applications using proven patterns and techniques”, 3rd Edition, July 2020</li> <li>3. <b>F. Y. M.C.A. Pattern 2022 Semester: II MCA222005: UI/UX Design</b>			
<b>Teaching Scheme:</b>	<b>Credit Scheme:</b>	<b>Examination Scheme:</b>	
<b>Theory : 03 hrs/week</b>	<b>03</b>	<b>InSem Exam: 20Marks</b> <b>Continuous Comprehensive Evaluation: 20Marks</b> <b>EndSem Exam: 60Marks</b>	
<b>Prerequisite Courses, if any: Software Engineering</b>			
<b>Course Objectives:</b>			
35. To learn the factors that determine how people use technology			
36. To study the usable software-enabled user-interfaces			
37. To achieve efficient, effective, and safe interaction			
<b>Course Outcomes:</b> On completion of the course, students will be able to–			
	<b>Course Outcomes</b>	<b>Bloom's Level</b>	
<b>CO1</b>	Describe user interface and user experience fundamentals	1-Knowledge	
<b>CO2</b>	Recognize the quality of service and data visualization	2-Understand	
<b>CO3</b>	Examine the data-driven UI designs and user experiences	4-Analyze	
<b>CO4</b>	Test the usability of a design through usability evaluations	4-Analyze	
<b>COURSE CONTENTS</b>			
<b>Unit I</b>	<b>Introduction and Overview</b>	<b>07hrs</b>	<b>COs Mapped - CO1</b>
The Human –I/P, O/P channels, Human Memory, thinking, emotion, individual difference (diversity), human psychology Introduction to User experience and user interaction-Usability of interactive systems, goals and measures, Universal Usability, Characteristics of graphical and web user interfaces, guidelines, principles and theories of good design, User Experience- Concept of UX, Trends in UX, 6 Stages used to UX design , Applications of UX design			
<b>Unit II</b>	<b>Design Process</b>	<b>08hrs</b>	<b>COs Mapped – CO1, CO4</b>
Managing design processes, organizational design to support usability, pillars of design, development methodologies, Human considerations in Design, Usability- principles to support usability, assessment in the design process, Usability problems, practical measures of usability, objective measures of usability, golden rules of interface design, Evaluating Interface Design –Introduction, Expert reviews, Usability testing, Acceptance tests, Legal issues			
<b>Unit III</b>	<b>Interaction Styles</b>	<b>(07hrs)</b>	<b>COs Mapped – CO1,CO3</b>
Direct manipulation and virtual environment, Develop system menus and navigation schemes-Structure of menus, Function of menus, content of menus, phrasing the menu, navigating menus, kinds of graphical menus, form fill-in and dialog boxes, command-organization , functionality, strategies and structure, naming and abbreviations, interaction devices, collaboration and social media participation			

<b>Unit IV</b>	<b>Implementation support and Screen Based Controls</b>	<b>07hrs</b>	<b>COs Mapped – CO3</b>
----------------	---	--------------	-------------------------

**Implementation support:**  
Support, training and learning, requirement of user support, element of windowing systems, Individual window design, multiple window design, command organization strategies command menus, natural languages in computer

**Screen Based Controls:**  
Selection control-Radio buttons, check boxes, list boxes, Read-only controls- text boxes, Operable controls - buttons, slider, tab, scroll bar, clear text and messages, text for web pages, Graphics, icons and images, Presentation controls-Static text fields, Group boxes, column headings, tool tips, progress indicators

<b>Unit V</b>	<b>Design Issues</b>	<b>07hrs</b>	<b>COs Mapped - CO2</b>
---------------	----------------------	--------------	-------------------------

Quality of service- Models of response time impacts, user productivity, variability in response time, Balancing function and fashion- Error messages, display design, web page design, window design, color, Information visualization – data type by task taxonomy, challenges for information visualization, societal and individual impact of user interface

<b>F. Y. M.C.A. Pattern 2022 Semester: II MCA222006: Audit Course</b>												
<b>Teaching Scheme:</b>	<b>Credit Scheme:</b>	<b>Examination Scheme:</b>										
-	-	<b>Grade</b>										
<b>Course Guidelines</b>												
<p>In addition to credits, it is recommended that there should be audit course, in preferably in second semester in order to supplement students' knowledge and skills. Student will be awarded the master's degree if he/she earns specified total credit and clear the audit course specified in the curriculum. The student will be awarded grade as AP on successful completion of audit course. The student may opt for one of the audit course in second semester. List of options offered is provided. Each student has to choose one audit course from the list. Evaluation of audit course will be done at institute level itself. Method of conduction and method of assessment for audit courses are suggested.</p>												
<b>Criteria</b>												
<p>The student registered for audit course shall be awarded the grade A,B,C,D and shall be included such grade in the Semester grade report for that course, provided student has the minimum attendance as prescribed by the institute and satisfactory performance and secured a passing grade in that audit course. No grade points are associated with grade and performance in these courses is not accounted in the calculation of the performance indices SGPA and CGPA. Evaluation of audit course will be done at institute level itself</p>												
<b>Guidelines for Conduction and Assessment (Any one or more of following but not limited to)</b>												
<ul style="list-style-type: none"><li>• Lectures/ Guest Lectures</li><li>• Visits (Social/Field) and reports</li><li>• Demonstrations</li><li>• Surveys</li><li>• Mini-Project</li><li>• Hands on experience on focused topic</li></ul>												
<b>Course Guidelines for Assessment (Any one or more of following but not limited to)</b>

<b>F. Y. M.C.A.</b> <b>Pattern 2022 Semester: II</b> <b>MCA222006A: Audit Course : Entrepreneurship Management</b>			
<b>Teaching Scheme:</b>	<b>Credit Scheme:</b>	<b>Examination Scheme:</b>	
	-	<b>Grade</b>	
<b>Prerequisite Courses, if any: Nil</b>			
<b>Course Objectives:</b>			
38. Gain knowledge of the context, concepts and process of entrepreneurship			
39. Conceive and develop entrepreneurial opportunities			
40. Determine the feasibility of a new business concept			
<b>Course Outcomes:</b> On completion of the course, students will be able to–			
	<b>Course Outcomes</b>		<b>Bloom's Level</b>
<b>CO1</b>	Define concepts of entrepreneurship development		1-Knowledge
<b>CO2</b>	Explain entrepreneurial venture		1-Knowledge
<b>CO3</b>	Identify entrepreneurial opportunity		1-Knowledge
<b>CO4</b>	Recognize roles of government in entrepreneurship development		1-Knowledge
<b>CO5</b>	Implement project management concepts		3-Apply
<b>COURSE CONTENTS</b>			
<b>Unit I</b>	<b>Entrepreneurial Development Perspective</b>	-	<b>COs Mapped - CO1</b>
<b>Content of Unit I</b>			
Concepts of Entrepreneurship Development, Evolution of the concept of Entrepreneur, Entrepreneur Vs. Intrapreneur, Entrepreneur Vs. Entrepreneurship, Entrepreneur Vs. Manager, 4. Attributes and Characteristics of a successful Entrepreneur, Role of Entrepreneur in Indian economy and developing economies with reference to Self-Employment Development			
<b>Unit II</b>	<b>Creating Entrepreneurial Venture</b>	-	<b>COs Mapped - CO1, CO2</b>
Business Planning Process, Environmental Analysis - Search and Scanning, Identifying problems and opportunities, Defining Business Idea, Basic Government Procedures to be complied			
<b>Unit III</b>	<b>Project Management</b>	-	<b>COs Mapped - CO1, CO5</b>
Technical, Financial, Marketing, Personnel and Management Feasibility, Estimating and Financing funds requirement - Schemes offered by various commercial banks and financial institutions like IDBI, ICICI, SIDBI, SFCs, Venture Capital Funding			
<b>Unit IV</b>	<b>Entrepreneurship Development and Government</b>	-	<b>COs Mapped - CO4</b>
Role of Central Government and State Government in promoting Entrepreneurship - Introduction to various incentives, subsidies and grants - Export Oriented Units - Fiscal and Tax concessions available. Role of following agencies in the Entrepreneurship Development - District Industries Centers (DIC),			

Small Industries Service Institute (SISI), Entrepreneurship Development Institute of India (EDII), National Institute of Entrepreneurship & Small Business Development (NIESBUD), National Entrepreneurship Development Board (NEDB)			
<b>Unit V</b>	<b>Opportunity / Identification and Product Selection</b>	-	<b>COs Mapped - CO1, CO2,CO3</b>
Entrepreneurial Opportunity Search and Identification; Criteria to Select a Product; Conducting Feasibility Studies; Project Finalization; Sources of Information

**Prerequisite Courses, if any:** Nil

**Course Objectives:**

2. Understand the importance of ecological balance for sustainable development.
3. Recognize the impacts of developmental activities and mitigation measures.
4. Understand and realize the multi-disciplinary nature of the environment, its components, and inter-relationship between man and environment
5. Understand the relevance and importance of the natural resources in the sustenance of life on earth and living standard

**Course Outcomes:** On completion of the course, students will be able to–

	<b>Course Outcomes</b>	<b>Bloom's Level</b>
<b>CO1</b>	Identify different types of environmental pollution and control measures	1-Knowledge
<b>CO2</b>	Comprehend the importance of ecosystem and biodiversity	2-Understand
<b>CO3</b>	Compare the exploitation and utilization of conventional and non-conventional resources	2-Understand
<b>CO4</b>	Correlate the human population growth and its trend to the environmental degradation and develop the awareness about his/her role towards environmental protection and prevention	4-Analyze

**COURSE CONTENTS**

<b>Unit I</b>	<b>Introduction</b>	-	<b>COs Mapped - CO1</b>
---------------	---------------------	---	-------------------------

Introduction: Environment - Components of Environment Ecosystem: Types & Structure of Ecosystem, Function, Energy flow, Ecological succession, Forest, grassland, desert and aquatic ecosystems - Introduction, characteristic features, structure and function. Balanced ecosystem Impacts of Agriculture & Housing Impacts of Industry, Mining & Transportation Environmental Impact Assessment

<b>Unit II</b>	<b>Natural Resources</b>	-	<b>COs Mapped - CO1,CO3</b>
----------------	--------------------------	---	-----------------------------

Natural Resources: Introduction, Renewable and non-renewable, Forest, water, mineral, food, energy and land resources, Individual and conservation of resources, Equitable use of resources.

<b>Unit III</b>	<b>Biodiversity</b>	-	<b>COs Mapped - CO1, CO2</b>
-----------------	---------------------	---	------------------------------

Genetic, Species and ecological diversity, Biogeographical classification of India, Value and hot spots, Biodiversity at global, national and local levels, India as mega biodiversity nation, Threats to biodiversity, Endangered and endemic species of India, Conservation of Biodiversity, Endangered and endemic species, Conservation of biodiversity.

<b>Unit IV</b>	<b>Environmental Pollution</b>	-	<b>COs Mapped -</b>
----------------	--------------------------------	---	---------------------

			<b>CO1,CO4</b>
Definition, Causes, effects and control measures of the pollution, Water Pollution, Noise pollution, Land Pollution, Public Health Aspects. Global Environmental Issues: Population Growth, Urbanization, Land Management, Water and Waste Water Management, Role of Individual in Prevention of Pollution, Pollution case studies			
<b>Unit V</b>	<b>Air Pollution &amp; Automobile Pollution</b>	-	<b>COs Mapped - CO1,CO4</b>
Definition, Effects , Global Warming, Acid rain & Ozone layer depletion, controlling measures. Solid Waste Management, E - Waste Management & Biomedical Waste Management -Sources, Characteristics & Disposal methods.
