

### **Teachers feedback Analysis**

**Academic Year: 2023-24**

**No. of Feedbacks received: 11**

1.	New topics that should be added to existing course	Time series algorithms, Vibration in more detail, Product design and development
2.	New courses in autonomy	Smart Materials, Finite Element Analysis, Data Science, Statistics and Probability, Friction Wear and Lubrication, Hydraulics and Pneumatics, MQC, MSD and SPM, Industrial management

### **Action Taken:**

All the above topics suggested by faculty members are included in the syllabus framed under autonomy for third and final year students.

Head,

Mechanical Engineering Department
