<b>COURSE CONTENTS</b>			
<b>Unit I</b>	<b>Matrices and Linear System of Equations</b>	<b>(07hrs+2hrsTutorial)</b>	<b>COs Mapped - CO1, CO2,CO3</b>
Rank of a matrix, system of linear Equations, Linear Dependence and Independence of vectors, Linear and orthogonal transformations, Application to system of linear equations.			
<b>Unit II</b>	<b>Eigen Values and Eigen Vectors</b>	<b>(08hrs+2hrsTutorial)</b>	<b>COs Mapped - CO1, CO2, CO3, CO5</b>
Eigen values & Eigen vectors, diagonalization, quadratic forms and reduction of quadratic forms to canonical forms, applications of Eigen values and Eigen vectors.			

<b>Unit III</b>	<b>Partial Differentiation</b>	<b>(07hrs+ 2hrsTutorial)</b>	<b>COs Mapped - CO2, CO3</b>
Introduction to functions of two or more variables, Partial Differentiation, Euler's Theorem on Homogeneous Functions, Partial differentiation of Composite and Implicit functions, Total derivatives.			
<b>Unit IV</b>	<b>Application of Partial Differentiation</b>	<b>(07hrs+ 2hrsTutorial)</b>	<b>COs Mapped - CO1, CO2, CO3, CO5</b>
Jacobians, Functional Dependence & Independence, Errors and Approximation, Maxima and Minima of Functions of two variables, Lagrange's method of undetermined multipliers.			
<b>Unit V</b>	<b>Introduction to Probability and Counting</b>	<b>(07hrs+ 2hrsTutorial)</b>	<b>COs Mapped - CO1, CO2, CO3</b>
Interpreting probabilities, Relative frequency and classical definition of probability, sample spaces and Events, mutually exclusive events, Permutations and Combinations, Axioms of probability, Addition rule, conditional probability, multiplication rule, Independent Events, Bayes' Theorem.

<b>COURSE CONTENTS</b>			
<b>Unit I</b>	<b>Cells, Batteries and Electro analytical Techniques</b>	<b>(8hrs)</b>	<b>CO1,CO4</b>
<p>Introduction: Dry cell, alkaline battery, Ni-Cd battery, H<sub>2</sub>O<sub>2</sub> fuel cells, Lithium ion battery. Reference electrode (calomel electrode), ion selective electrode (combined glass electrode).</p> <p>Conductometry: Introduction, conductometric titrations of acid versus base with titration curves (SA-SB).</p> <p>pH metry: Introduction, standardization of pH meter, pH metric titration of strong acid versus strong base with titration curve.</p> <p>UV-Visible Spectroscopy: Introduction, interaction of electromagnetic radiation with matter, statement of Beer's law and Lambert's law, different electronic transitions, terms involved in UV-visible Spectroscopy.</p>			

<b>Unit II</b>	<b>Fuels</b>	<b>(8hrs)</b>	<b>CO1, CO4, CO5</b>
Introduction, classification, Calorific value (CV): Gross calorific value (GCV) and Net calorific value (NCV), Determination of Calorific value: Bomb calorimeter, Solid fuel: Coal: Analysis of Coal-Proximate and Ultimate analysis, Liquid fuel: Petroleum: Refining of petroleum, CNG, Hydrogen gas as a fuel. Alternative fuels: Power alcohol, biodiesel and Rocket propellants, Knocking in engines, octane number and cetane number.			
<b>Unit III</b>	<b>Introduction to Engineering Materials</b>	<b>(8hrs)</b>	<b>CO1, CO2</b>
Solid: crystalline and amorphous solids, Polymorphism, unit cell, crystal system-cubic, APF. Metallurgy-Ores and Minerals, Alloys- classification. Composition, woods metal, brass, Bronze, Ti-alloys. Preparation of alloys by fusion and powder method. Introduction of polymer: Terms-Speciality polymers: Introduction, structure, properties and applications of the polymers: 1. Bio-degradable polymers: Poly (hydroxybutyrate-hydroxyvalanate), 2. Conducting and doped conducting Polymer: Polyacetylene 3.Polymer Composite, Nanomaterials: Introduction, definition, classification of nanomaterials based on dimensions, properties and general applications.			
<b>Unit IV</b>	<b>Analytical Aspects of Fluids</b>	<b>(8hrs)</b>	<b>CO1, CO2, CO3, CO4, CO5</b>
Properties of Fluids-Surface Tension, Capillary action , Viscosity, Vapour Pressure, Types of Fluid Liquid Fluid- Water and Oil <b>Water:</b> hardness of water: Types, Determination of hardness by EDTA method, Chloride content in water by Mohr's method, Ill effects of hard water in boiler, External Treatment of water i) Zeolite method ii) Demineralization method. Purification of water: Reverse osmosis. Oil: Aniline point, Flash Point, Fire point. Gaseous fluids: Gas Sensors, Types of Gas sensors			
<b>Unit V</b>	<b>Corrosion Science</b>	<b>(8hrs)</b>	<b>CO3, CO5</b>
Introduction, Types of corrosion – Dry and Wet corrosion, mechanism, nature of oxide films and Pilling-Bedworth's rule, hydrogen evolution and oxygen absorption, Factors influencing rate of corrosion. Methods of corrosion control: cathodic protection, Metallic coatings and its types, Galvanizing and Tinning, Electroplating, Powder coating.

#### **Guidelines for Laboratory Conduction**

1. Teacher will brief the given experiment to students its procedure, observations calculation, and outcome of this experiment.
2. Apparatus, chemicals, solutions and equipments required for given experiment will be provided by the lab assistants using SOP.
3. Students will perform the same experiment in a group (two students in each group) under the supervision of faculty and lab assistant. After performing the experiment students will check

their readings, calculations from respective teacher.

**Guidelines for Student's Lab Journal**

Write-up should include title, aim, diagram, working principle, procedure, observations, graphs, calculations, conclusion and questions, if any.

**Guidelines for Term work Assessment**

Each experiment from lab journal is assessed for thirty marks based on three rubrics. Rubric R-1 for timely completion, R-2 for understanding and R-3 for presentation/journal writing where each rubric carries ten marks.

<b>COURSE CONTENTS</b>			
<b>Unit I</b>	<b>Resolution, Composition, Moment of Forces and Equilibrium of particle</b>	<b>(10hrs)</b>	<b>CO1, CO2, CO3</b>
a) <b>Resultant of force system:</b> Basic concepts, force system, resolution and composition of forces, resultant of coplanar forces, moment of a force, Varignon's theorem, resultant of parallel force system, couple, equivalent force-couple systems b) <b>Equilibrium:</b> Free body diagram, conditions of equilibrium for various force systems, equilibrium of two, three and more than three forces.			
<b>Unit II</b>	<b>Analysis of Statically Determinate Beams and Truss</b>	<b>(7hrs)</b>	<b>CO1, CO2, CO3</b>
a) Types of beams and types of supports b) Reactions of simple beams and reactions of Cantilever beams. c) Two force members, analysis of plane truss using method of joints and sections			
<b>Unit III</b>	<b>Centroid and Moment of Inertia</b>	<b>(7hrs)</b>	<b>CO1, CO2, CO4</b>
a) Centre of gravity, centre of mass and centroid, centroid of plane laminas. Area moment of inertia.			

<b>Unit IV</b>	<b>Friction</b>	<b>(7hrs)</b>	<b>CO1, CO2, CO3</b>
a) Nature and characteristic of friction, static and dynamic friction, laws of friction, angle of friction, angle of repose, cone of friction. b) Block friction on horizontal and inclined planes, wedge friction. Ladder friction and Belt friction.			
<b>Unit V</b>	<b>Kinetics</b>	<b>(9hrs)</b>	<b>CO1, CO2, CO3, CO5</b>
a) Kinetics of rectilinear and curvilinear motion. b) <b>Work-energy principle:</b> Work, power and energy, work-energy principle. c) <b>Collision of elastic bodies:</b> Impact, elastic and inelastic impact, conservation of momentum, coefficient of restitution, Impulse-momentum principle

<b>Guidelines for Laboratory Conduction</b>		
Students will solve six laboratory assignments on A2 size drawing sheet.		
<b>Guidelines for Tutorial Conduction</b>		
Students will solve four tutorial assignments by using any drafting software. Drawing limits for all drawings to be made in drafting software should be set to A2 Size. At the end of semester students shall submit all soft copies of all assignments to a concerned faculty.		
<b>Guidelines for Termwork and Tutorial Assessment</b>		
Each laboratory and tutorial assignments will be assessed for 30 Marks according to following rubrics: R1- Timely completion of assignments (10 Marks) R2- Understanding of assignment (10 Marks) R3 – Presentation/Clarity of journal writing (10 Marks) For all six drawing sheets total marks of 180 will be converted into 25 Marks. For all four tutorial assignments total marks of 120 will be converted into 25 marks.

List of Laboratory Experiments / Class Assignments		
Sr. No.	Laboratory Experiments / Class Assignments	COs Mapped
1	<p><b>English Language Basics – Class Assignments</b> Fundamentals of English grammar, Vocabulary Building, Developing basic writing skills and Identifying Common Errors in Writing</p>	CO1
2	<p><b>Listening and Reading Skills</b>  <b>a. Listening Worksheets using Language Lab Software</b> Each student will be given specifically designed worksheets that contain blanks / matching / MCQs that are designed to an audio (chosen by the faculty). Students have to listen to the audio (only once) and complete the worksheet as the audio plays. This will help reiterate active listening as well as deriving information (listening to information between the lines)  <b>b. Reading Comprehension Worksheets to be distributed/displayed to students. – Class Assignments</b> Teacher will choose reading passages from non-technical domains, design worksheets with questions for students to answer. This will enhance student's reading skills by learning how to skim and scan for information.</p>	CO1
3	<p><b>Writing Skills</b>  <b>a. Letter / Email Writing – Lab Experiment</b> After explaining to the students the highlights of effective writing, students can be asked to write (using digital platforms / paper-based) letter to an organization with the following subject matter,  <b>i.</b> Requesting opportunity to present his/her product.  <b>ii.</b> Complaining about a faulty product / service.  <b>iii.</b> Apologizing on behalf of one's team for the error that occurred.  <b>iv.</b> Providing explanation for a false accusation by a client.  <b>b. Abstract Writing – Class Assignment</b> Teacher will choose a newspaper article / short stories and ask students to write an abstract.</p>	CO1
4	<p><b>Speaking Skills / Oral Communication – Part A</b>  <b>a. One minute Self Introduction – Class Assignment</b> Explain how to introduce oneself in a professional manner and presenting oneself positively Name, Academic Profile, Achievements, Career Aspirations, Personal Information (hobbies, family, social).  <b>b. Presentations – Lab Experiment</b></p>	CO5, CO2
	<p>Every student will have to choose a topic of his/her choice and make a 5-minute presentation using audio-video aids / PPT. Every student will make two presentations on – one technical and other non-technical topic. Focus and evaluation of each presentation should be the depth of knowledge about the topic, originality of perspective on the topic, well-researched or not, verbal and non-verbal skills and ability to answer questions effectively. Plagiarism should be discredit and students should be instructed about it.</p>	

5	<p><b>Speaking Skills / Oral Communication – Part B</b></p> <p><b>a. Group Discussion – Lab Experiment / Class Assignment</b></p> <p>The class will be divided into groups of 5-6 students for a discussion lasting 15 minutes. Topics should be provided by teachers. After each group finishes its discussion, the teacher will give critical feedback including areas of improvement. The teacher should act as a moderator / observer only</p>	CO1, CO5, CO2, CO3
6	<p><b>Extempore</b></p> <p>Various topics will be laid out in front of the audience and each student is to pick one topic and speak about the topic for 5 minutes followed by Q&amp;A from audience. Teacher will evaluate each student based on thinking ability, content, communication skills, logical and cohesive presentation of topic, perspective of student, ability to handle questions and respond positively</p>	CO1, CO2
7	<p><b>SWOC Analysis</b></p> <p><b>a.</b> Focus on introspection and become aware of one's Strengths, Weakness, Opportunities and Challenges. Students can write down their SWOC in a matrix and the teacher can discuss the gist personally.</p> <p><b>b. Resume Writing</b></p> <p>The teacher should conduct a brief session outlining the importance of a CV / Resume and students can write / type out their own resumes</p> <p>i. Share various professional formats.</p> <p>ii. Focus on highlighting individual strengths.</p> <p>iii. Develop personalized professional goals / statement at the beginning of the resume.</p>	CO4

#### **Guidelines for Laboratory Conduction**

The teacher may design specific assignments that can highlight the learning outcomes of each unit. Each activity conducted in the lab should begin with a brief introduction of the topic, purpose of the activity from a professional point of view and end with the learning outcomes as feedback from students. Most of the lab sessions can be designed to be inclusive; allowing students to learn skills experientially; which will benefit them in the professional environment. Every student must be given sufficient opportunity to participate in each activity and constructive feedback from the instructor / facilitator at the end of the activity should learn towards encouraging students to work on improving their skills. Activities should be designed to respect cultural, emotional and social standing of students. Some of the activities can be designed to cater to enhancement of multiple skills – e.g. Team Building Activity can highlight 'open communication', 'group discussion', 'respecting perspectives', 'leadership skills', 'focus on goals' which can help students improve their inherent interpersonal skills. At least one session should be dedicated to an interactive session that will be delivered by an expert from the industry; giving the students an exposure to professional expectations.

#### **Guidelines for Student's Lab Journal**

Each student should have a Lab Workbook (sample workbook attached) which outlines each lab activity conducted. The student must respond by writing out their learning outcomes and elaborating the activities performed in the lab., group discussion, group exercises and interpersonal skills and similar other activities/assignments.

#### **Guidelines for Term work Assessment**

Continuous assessment of laboratory work is to be done based on overall performance and lab assignments and performance of student. Each lab assignment assessment will be assigned grade/marks based on parameters with appropriate weightage. Suggested parameters for overall assessment as well as each lab assignment assessment include- timely completion, performance, punctuality, neatness, enthusiasm, participation and contribution in various activities-SWOC analysis, presentations, team activity, event management

#### Guidelines for Laboratory Conduction

1. Teacher will brief the given experiment to students its procedure, observations calculation, and outcome of this experiment.
2. Apparatus and equipments required for the allotted experiment will be provided by the lab assistants using SOP.
3. Students will perform the allotted experiment in a group (two students in each group) under the supervision of faculty and lab assistant.
4. After performing the experiment students will check their readings, calculations from the teacher.

5. After checking they have to write the conclusion of the final result.

**Guidelines for Student's Lab Journal**

Write-up should include title, aim, diagram, working principle, procedure, observations, graphs, calculations, conclusion and questions, if any.

**Guidelines for Termwork Assessment**

Each experiment from lab journal is assessed for thirty marks based on three rubrics. Rubric R-1 for timely completion, R-2 for understanding and R-3 for presentation/journal writing where each rubric carries ten marks.

<b>Lecture : 01 hrs/week Practical : 02 hrs/week</b>	<b>01 01</b>	<b>Continuous Comprehensive Evaluation :25 Marks Term work: 25 Marks</b>
<b>Course Objectives:</b> To acquire the basic knowledge of fundamentals Machine Tools. To inculcate the basics of various manufacturing processes. To impart practical aspects of Machine Tools and Manufacturing processes used in industrial applications To develop the skill through hands-on practices using hand tools, power tools, machine tools in manufacturing and assembly shop		
<b>Course Outcomes:</b> On completion of the course, students will be able to–		
	<b>Course Outcomes</b>	<b>Bloom's Level</b>
<b>CO1</b>	Select appropriate machine and cutting tools for a given application	1- Remember
<b>CO2</b>	Describe the process and programming methods for CNC machines and 3D printing	2-Understand
<b>CO3</b>	Apply the basic knowledge of Shop Floor Safety, Machine tools and Manufacturing processes.	3-Apply
<b>CO4</b>	Fabricate the simple mechanical parts	3-Apply

<b>COURSE CONTENTS</b>			
<b>Unit I</b>	<b>Workshop Safety and Maintenance</b>	<b>(2 hrs)</b>	<b>COs Mapped- CO3</b>
<p><b>a. Introduction to Workshop Safety:</b> Introduction to workshop safety norms and guidelines. Identifying potential hazards in a workshop. Proper usage of personal protective equipment (PPE). Safety guidelines for handling various tools and equipment. Emergency procedures and first aid basics.</p> <p><b>b. Workshop Maintenance and Housekeeping:</b> Importance of workshop maintenance and cleanliness. Regular maintenance of tools and equipment. Workshop layout and organization for efficient workflow. Proper storage of tools and materials to ensure longevity.</p>			
<b>Unit II</b>	<b>Measurement and Introduction to Welding</b>	<b>(2 hrs)</b>	<b>COs Mapped- CO2</b>
<p><b>a. Measurement and Metrology:</b> Importance of accurate measurement in workshop practice. Various measuring tools and their uses – vernier calipers, micrometers, rulers, etc. Metrology and its role in quality control. Understanding measurement units and conversions.</p> <p><b>b. Introduction to Welding Shop:</b> Overview of Welding Shop and its applications. Understanding the arc welding process and its principles. Safety precautions for welding operations. Demonstration of simple welding tasks.</p>			

<b>Unit III</b>	<b>Machine Tools</b>	<b>(2 hrs)</b>	<b>COs Mapped- CO1,CO2</b>
<p><b>a. Demonstration of Conventional Machine Tools:</b> Introduction to Lathe and its components. Understanding the Milling Machine and its operations. Practical applications of Lathe and Milling Machine in different industries. Safety guidelines while operating conventional machine tools.</p> <p><b>b. Introduction to CNC Machine Tools:</b> Understanding CNC (Computer Numerical Control) technology. Types of CNC machines - CNC turning, VMC (Vertical Machining Center), and plasma arc machining, CNC wood router, etc. Detailed demonstration of any one CNC process, including a programming assignment. Safety considerations specific to CNC machine operations.</p>			
<b>Unit IV</b>	<b>Introduction to 3D Printing</b>	<b>(2 hrs)</b>	<b>COs Mapped- CO2</b>
<p><b>a. 3D Printing:</b> Overview of 3D printing technology and its applications. Step-by-step process of 3D printing, from design to printing. Software used in 3D printing - creating a design, exporting STL file, choosing parameters, and generating G code. Safety measures while handling 3D printing equipment and materials.</p> <p><b>b. Materials and Their Properties:</b> Overview of common workshop materials - metals, wood, and plastics. Physical and mechanical properties of materials. Material selection criteria for specific projects. Recycling and sustainable practices in the workshop.</p>			
<b>Unit V</b>	<b>Workshop Projects, Problem-Solving and Troubleshooting</b>	<b>(02 hrs)</b>	<b>COs Mapped -CO4</b>
<p><b>a. Introduction to Workshop Projects:</b> Planning and executing workshop projects. Understanding project requirements and specifications. Breakdown of complex tasks into smaller achievable steps. Importance of teamwork and collaboration in workshop projects.</p> <p><b>b. Problem-Solving and Troubleshooting:</b> Approaches to problem-solving in workshop scenarios. Common issues and challenges in workshop practice. Troubleshooting techniques for tools and equipment. Encouraging a proactive approach to tackle workshop-related problems.</p>			

<b>List of Laboratory Experiments / Assignments</b>		
<b>Sr. No.</b>	<b>Laboratory Experiments / Assignments</b>	<b>COs Mapped</b>
1	<b>Workshop safety</b> Introduction to workshop facilities, workshop safety norms.	<b>CO3</b>
2	<b>Fitting shop</b> Preparation of simple fitting job having sawing, filing, drilling, tapping operations using different tools/equipments such as files, hammers, drills & taps, etc.	<b>CO4</b>
3	<b>Tin Smithy shop</b> Preparation of simple sheet metal job having shearing, bending and joining operations using different tools/equipments such as hammers, mallet, stake block, snip, etc. needed for it.	<b>CO4</b>
4	<b>Carpentry Shop</b> Preparation of simple wooden job having marking, sawing, planing, chiseling operations using different tools/equipments such as saws, Jack plane, chisel, hammer, mallet etc. needed for it.	<b>CO4</b>

5	<b>Welding Shop</b> Demonstration of simple welding job using arc welding process.	CO1
6	<b>Demonstration of conventional machine Tools</b> Demonstration of conventional machine Tools: Lathe and Milling machine	CO1
7	<b>Demonstration of CNC machine Tools</b> Introduction to CNC turning, VMC, plasma arc machining, Laser cutting, CNC wood router. Detail demonstration of any one process with one programming assignment.	CO2
8	<b>Demonstration of 3D printing</b> Demonstration of basic steps of 3D printing such as creating a design, exporting STL file, choosing parameters, creating G code and printing	CO2
<b>Guidelines for Laboratory Conduction</b>		
<ol style="list-style-type: none"> <li>1. Importance of workshop practical and shop floor safety norms should be emphasized in the first practical session.</li> <li>2. Students should develop one product/prototype involving operations from Practical 2 to 5.</li> <li>3. Instructor should demonstrate detailed working of welding and machine tools.</li> <li>4. Instructor should demonstrate one programming assignment on 3D printing and CNC machine.</li> </ol>		
<b>Guidelines for Student's Lab Journal</b>		
<ol style="list-style-type: none"> <li>1. Prepare work diary based on practical performed in workshop. Work diary consists of job drawing, operations to be performed, required raw materials, tools, equipments, date of performance with instructor signature.</li> <li>2. Student has to maintain one file for write ups based on safety norms and illustrations/sketches of demonstrated parts/mechanisms/machine tools etc.</li> </ol>		
<b>Guidelines for Termwork Assessment</b>		
Term work assessment shall be based on the timely completion of jobs, quality of job, skill acquired, completion of workshop diary and brief write-ups.

### **Preamble**

Experiential learning involves a number of steps that offer student a hands-on, collaborative and reflective learning experience which helps them to “fully learn new skills and knowledge”. During each step of the experience, students will engage with the content, the instructor, each other as well as self-reflect and apply what they have learned in another situation.

Students undergo the Experiential Learning through following phases of Engineering Exploration, Engineering Design and Product Realization. Students will undertake mini projects to acquaint with knowledge in the various domains of Engineering.

The course introduces students to analyzing, designing, developing, testing, report writing and project presentations that demonstrate understanding. Students will be asked to observe, document, raise questions and draw conclusions. Teachers rely on a variety of resources to enrich students’ studies that may include meeting experts and hands-on experimentation.

### **Guidelines for Course Conduction**

- There should be a group of 4-5 students.
- Groups will be monitored by the Course teacher.
- Following two assignments will be completed by all groups
  - A) Exploration of an Engineering product like Electronic Voting Machine, Car, Mobile handset, Elevator / Escalator, Operation Table, Solar water heater. The exploration will be based on working principle, specifications, material used, manufacturing process, technology used, operations (observable and controllable), ergonomics, extent of automation, safety features, environmental issues, maintenance and costing.
  - B) Teachers will identify 12-15 mini project ideas.
- Every group will undertake a mini project in consultation with the Course teacher.
- Project ideas will be common to all first year divisions but the implementation might be different.
- The students will plan, manage and complete the associated tasks.

### **Guidelines for Course Completion**

Students will present/submit the Mind Map of the Engineering product chosen for exploration. Students will exhibit/demonstrate the completed project at the end of the semester along with a brief report in a recommended format as term work submission.

### **Guidelines for Term work Assessment**

The Course teacher is committed to assess and evaluate the students’ performance. Progress of work done will be monitored on weekly basis.

During process of monitoring and continuous assessment, the individual and team performance is to be measured.

- Individual assessment for each student should be based on understanding individual capacity, role and involvement in the Engineering Product Exploration/project.
- Group assessment should be based on roles defined, distribution of work, intra-team communication and togetherness.
- Documentation and Demonstration.

It is recommended that all activities are to be recorded regularly and proper documents are to be maintained by both students as well as the course teacher.

Continuous Assessment Sheet (CAS) is to be maintained by the Course teacher.

A) Recommended parameters for assessment of Engineering Product Exploration: (25marks)  
Working principle, specifications, material used, manufacturing process, technology used, operations (observable and controllable), ergonomics, extent of automation, safety features,

environmental issues, maintenance and costing.

B) Recommended parameters for assessment of Project: (25marks)

- Outcomes of Mini Project / Problem Solving Skills / Solution provided / Final product **(50%)** (Individual assessment and team assessment)
- Documentation (Gathering requirements, design & modeling, implementation/execution, use of technology and final report, other documents) **(25%)**
- Demonstration (Presentation, User Interface, Usability, Participation in Exhibition/Contest etc) **(15%)**
- Awareness / Consideration of – Environmental / Social / Ethical / Safety / Legal aspects **(10%)**
